FIRE BASH

We were please to be involved with the NSW Rural Fire Service in the Brookvale to Bundaberg Bash. This is an Educational Program aimed at highlighting fire dangers. As a show of support we provided Storm Cases to Defy The Elements and Tomar Lights to clear the way.

AFAC TRADE SHOW

AFAC is the representative body for fire and emergency services in the Australasian region. This conference is aimed at creating fire awareness prevention.

On behalf of the Fire Response Team we would like to extend an invitation to invite you to come in and visit us at the Annual AFAC Conference:

Stand No: 40
Date: 11th – 12th August
Time: 9.00am – 5.00pm
Address: Melbourne Convention Centre
Cnr Spencer and Flinders Streets
MELBOURNE VIC 3005

TOMAR Electronics, Inc.

Clearing the Way

ARE YOU READY TO CLEAR THE WAY?

With the latest LED technology in the market, it's no wonder why Emergency Service and Industrial Customers are clearing the way with Tomar LED lights and sirens.

TOMAR RECT25

The iLED™ RECT25 is the first of TOMAR's new low profile series. Designed using the latest in LED technology, the RECT25 is unsurpassed in brightness and light distribution.

FEATURES:

- High efficiency TIR technology
- Super-wide angle for superior off-axis visibility
- 11 Flash rate options
- Available in amber, blue, red, white, and green
- Three intensities available

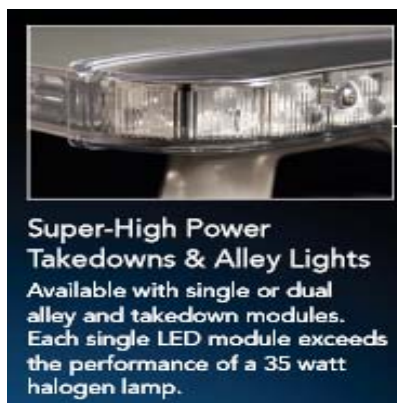

THE BLADE LOW PROFILE LIGHTBAR

TOMAR's advanced design and cutting-edge innovation shines through once again with the introduction of The Blade™ Low Profile Lightbar. The Blade™ will redefine the standard for high performance Low-Profile Lightbars for years to come. Not only is The Blade™ one of the thinnest lightbars in the industry, it's also the brightest among all lightbars. Engineered with the latest LED technology. The Blade™ is revolutionary in its modular design allowing for unparalleled versatility.

FEATURES:

- Up to 9 High-Performance modules to the front (8 with take down)
- Up to 9 High-Performance modules to the rear with integrated traffic director
- Available in 44", 49" and 54" lengths
- Extreme performance in a package under 2" high
- Adjustable beam angle LED takedown and alley lights
- Integrated traffic direction feature
- Multiple user-programmable flash patterns

200S SERIES

Designed with the latest in LED technology, the TOMAR 200S Series provides a sleek low-profile look with extreme light output. Our latest LED designs are based on TIR (Total Internal Reflection) technology and provide unprecedented off-centre visibility and a unique thermal management system that utilizes the 200S' entire housing to draw heat away from the LEDs for longer life and more consistent light output

FEATURES:

- High efficiency TIR technology
- Super-wide angle for superior off-axis visibility
- 10 Flash rates
- Standard flange or optional rail mount
- Available in amber, blue, red, white, and green
- Internal/external mounting
- Available in polished aluminium or black housing
- Available in 2, 6, and 8 Light

STREAMLIGHT BUILDERS OF THE WORLD'S MOST TRUSTED FLASHLIGHTS

PROPOLYMER SERIES

Alkaline battery-powered personal lights are shock and impact resistant. Extremely durable and long lasting - the 3C LED lasts up to 336 hours! Choose a Xenon, LED or a super-high flux Luxeon® LED. Most models are suitable for use in hazardous locations

FIRE VULCAN

FIREBOX

Streamlight is the number one rechargeable light for US firefighters. Water resistant, durable and safe in hazardous conditions, these lights range from the long running powerful halogen Firebox®, to lighter \ weight Fire Vulcan® lanterns with shoulder straps.

From the original Survivor, the first right angle rechargeable light ever designed comes the new Survivor LED.

The Survivor LED will never need to be replaced and provides the right type of light for a broad range of firefighting activity (structural firefighting, EMS, extrication, technical rescue, etc). Use your rechargeable battery for up to 6 hours. If you need a fast backup, slip in the alkaline battery pack and you'll have 6 more hours of available light.

FEATURES:

- Survivor® LED Rechargeable models fit existing Survivor® charging units
- Run times: up to 3 hrs. on high beam up to 6 hrs. low beam
- Microprocessor controls 3 levels of brightness: high/low beam and strobe
- Piercing bright white beam has 500ft range and optimal peripheral illumination.
- O-ring sealed for water resistance
- Rechargeable model includes back-up alkaline battery pack
- Raised push-button switch is recessed in polymer housing for protection
- "No excuses" lifetime warranty - the last right-angle light you'll ever buy
- Power: rechargeable or alkaline battery
